PROFILE

Full-stack developer with 6 years shipping web and mobile products end to end. Founder of **Suvio**, a restaurant payment platform (Flutter, React, NestJS); former CTO of **Daftar**, a personal-finance app. Five years of freelance frontend work with Alturos building a white-label tourism platform on Vue/Nuxt. Comfortable across React, React Native, Vue/Nuxt, Flutter, NestJS, Django and PostgreSQL, and use AI-assisted tools like Claude Code to move faster end to end. Currently exploring reinforcement learning and autonomous-driving projects on the side.

EXPERIENCE

Founder & Full-Stack Developer — Suvio **FOUNDER** 2025 — Present · Tabriz, Iran

- Founded and am building a restaurant payment platform launching next month — table-side payments, floor/order management, and an online menu.
- Built the Flutter staff dashboard for floor plans, table status and live kitchen order queues.
- Built the React guest app for menu browsing, ordering and bill-splitting.
- Built the NestJS + PostgreSQL backend powering real-time order and payment state.
- Using Claude Code and other AI-assisted tooling to move faster building solo across Flutter, React and NestJS.

Frontend Developer — Alturos (freelance) Feb 2022 — Jul 2026 · Remote

- Built and maintained ADA-web, a white-label Vue/Nuxt tourism platform for hotel booking, transportation and activities.
- Shipped the platform as regional marketplaces across the Alps, including myZillertal — accommodation search, interactive maps and booking/payment flows.
- Owned UI/UX implementation, performance optimization and backend integration across the five-year engagement.

CTO — Daftar **CTO** 2020 · Tabriz, Iran

- Led technical direction for a small team building a personal-accounting app.
- Built the React Native app for tracking cash, bank accounts, gold, coins and stocks with income/expense reporting.
- Shipped the product to launch end to end, from architecture to release.

Front-End Developer — Flexin LLC Mar 2020 — Jan 2022 · Tabriz, Iran

- Built a range of React and React Native products on the product team, including Send Me a Trainer (SMAT) — an admin panel (React + TypeScript) for a fitness-trainer booking service managing trainers, clients, sessions, packages and franchise-wide settings.
- Recognized with a WebcentriQ Appreciation Letter for diligence and creative problem-solving.
